# Printing and Scanning: What's New?

Now available for OnPremise and OnDemand for Government

Enhanced security

- Printing assessments now tied to scheduling permissions

New user interface to make navigating large assessment catalogs easier

New multi-lingual assessment support

Print to Word:

- Print assessment snapshots directly to Microsoft Word file format. Upload camera-ready PDFs to and automatically distribute them to test administrators.

# New Authoring APIs

- This feature introduces new oData APIs enabling access to:
  - The current (latest) revision of each Question in the authoring database including the full QML as a media stream; and
  - The current (latest) revision of each Assessment in the authoring database including an XML representation (AML) of the Assessment content.
- Feeds support for filtering and ordering by modification date to enable external sync or other process triggers
- Applications
  - New way for direct access to item & assessment data
  - Reporting/analytics on item bank
  - Address complex needs needing programmatic review/integration of their item bank and assessment authoring data

See for details

# Forensic Analysis Service – What is it?

- Statistical analyses of candidate test response data
- Who took the test honorably? Which scores are trustworthy?
- Identify EXTREMELY unusual behaviors with potential of unfair advantage

**Offered in partnership Caveon**
